

ETHAN (SUKHYUN) HONG

United States | (1) 424-384-8445 | sukhyun.hong.2025@anderson.ucla.edu | [Linkedin](#) | [Github](#) | [Blog](#) | [Tableau](#)

Product Manager & Data Analyst with 4yr+ experiences, with full stack of coverage in **AI, data science, data engineering**, and Product Management. Proficient in product data analysis, user experience improvement through A/B testing, app / web service production through cross-functional collaboration and software development management. Domain knowledge and experiences in video / live streaming, education, Generative-AI and NLP projects (LLM, NLTK etc). UCLA MSBA 2025 Candidate. (STEM M.S)

Product Management: Agile Scrum, A/B Testing, Figma, JIRA, Confluence, Product Requirement Definition, Product Improvement
Data Analytics: SQL, R, Tableau, PowerBI, AWS, Spark (Data Processing & ETL) MongoDB, Neo4j, PostgreSQL, Snowflake
Programming: Python (Pandas, Numpy, Pytorch, Keras, Scikit-Learn), JavaScript, HTML, CSS, Flask, FastAPI, Linux / Unix / bash
Soft Skills: Cross-Functional Collaboration, Communication, Leadership, Software Development Management, Timely delivery.

PROFESSIONAL EXPERIENCE

LA CLIPPERS.LLC

Los Angeles, CA

Business Insight Analyst – Intern

June 2025 – Sep 2025

- **Initiated 20% improvement in retail revenue & 40% store customer throughput** by analyzing large volume App & IOT log data, creating data processing pipeline and identifying main cause of bottleneck. [MS SQL Server / Power BI / Data Engineering]
- Processed log-level big data using Pyspark to build retail data analysis pipeline, and built regression model to propose commerce actions, measuring 15% improvement of expected sales revenue. [PySpark, Python, Power BI]
- **Improved precision of HR data pipeline & dashboard up to 95%**, identifying omitted data points and re-establishing data model, and delivered renewed dashboard.

MATCH GROUP - Hyperconnect

Seoul, South Korea

Product Manager / Analyst – Full time

Apr 2022 - Jul 2024

- **Increased service active users by 30%** by deploying continuous **A/B tests** on AI recommendation logic and UI improvement.
- **Increased efficiency of data delivery 30%** by **analyzed data through SQL** and **migrated ad-hoc queries requests / excel sheets into overall KPI monitoring dashboard** using **Redash and Tableau**.
- **Achieved 5%+ increase in monthly revenue and 20%+ contents viewership duration time**, leading a cross-functional team to build new video sharing feature and establish product roadmap. [iOS / Android / Web Platform Scrum Lead]

FLITTO

Seoul, South Korea

Product Manager – Full time

Oct 2021 – Apr 2022

- **Reduced data delivery lead time by 50%** by building an internal product used for text data annotation to automate manual annotating process, using **Python** and **Natural Language Processing API**.

AMAZON WEB SERVICES (AWS)

Seoul, South Korea

Data Analyst - Intern

Jul 2019 – Jan 2020

- Improved cloud usage metric (15% / Month) discovering **20+ underestimated clients** by developing a **predictive linear regression model**, using **Python, Tableau**.
- **Contributed to increase sales revenue 10% monthly for 200+ clients by defining new metric, processing log data with Python**, and visualizing on **Tableau** and closely working with solution architects.

HUMAN AND AI LAB YONSEI

Seoul, South Korea

Data Scientist Intern (Machine Learning & NLP)

Jan 2021 – Sep 2021

- **Developing a course [recommendation engine](#) that could increase student satisfaction by 20%** based on NLP models (**semantic similarity & BERT**), proposing a new personalized college course system and building user interface focusing on career interests.

PROJECTS & RESEARCH

• [US AIRLINE DASHBOARD PIPELINE](#) – Data Engineer

Los Angeles, CA

Reduced data loss from 60% to 0%, runtime by 67% by building and optimizing ETL process from data collection of US airline flight data, airport data and weather data, automating pipeline of preprocessing with Python, Spark and Snowflake. Orchestrated bash pipeline script on Linux environment on GCP.

UCLA RESEARCH - ANDERSON SCHOOL OF MANAGEMENT

Los Angeles, CA

Graduate Student Data Researcher - Part Time

July 2025 – Sep 2025

- Created data pipeline to build and process data-base for research project through web-scraping, and transformer NLP model [Data mining, Collection, Data pipeline building, Python, NLP]

EDUCATION

UCLA ANDERSON SCHOOL OF MANAGEMENT

Los Angeles, CA

M.S in Business Analytics (MSBA)

Sep 2024 - Dec 2025

Data Analytics, Data Science, Database Management and Engineering, Predictive Modeling through Python, R, SQL; Optimization and Machine learning for business decision-making. | **MSBA Merit Fellowship**. | **Graduate Research Assistant of [Prof.Rajaram](#)**

YONSEI UNIVERSITY, UNDERWOOD INTERNATIONAL COLLEGE

Seoul, South Korea

B.S. in Creative Technology Management, B.A in Quantitative Risk Management.

Mar 2015 - Feb 2022

Python, R, Machine Learning & Modeling, Data Visualization, Statistics / Linear Algebra / Calculus | Scholarship.
