Proficient in product data analysis, A/B testing, web & app service production through cross functional collaboration and software development management. Experienced in NLP / LLM utilization & workflow designs.

EDUCATION

UCLA ANDERSON SCHOOL OF MANAGEMENT

Los Angeles, CA

M.S in Business Analytics

Dec 2025

- Data Science & Analytics, Product Management, Database Management, Predictive Modeling, Python, R, SQL, AI/ML
- UCLA Merit Fellowship recipient, Graduate Student Researcher

YONSEI UNIVERSITY, UNDERWOOD INTERNATIONAL COLLEGE

Seoul, South Korea

B.S. in Creative Technology Management, B.A in Quantitative Risk Management

Feb 2022

- Business Management, Python, R, Machine Learning, Data Visualization, Statistics, Linear Algebra, Calculus
- Merit Fellowship recipient, Student Researcher at Human and AI Research Lab

TECHICAL SKILLS

Product Management: Agile, A/B Testing, Figma, JIRA, Confluence, Product Requirement Definition, User Experience.

AI / LLM : n8n, LLM, Natural Language Processing, LLM Workflow (RAG, Langchain)

Data Analytics: SQL, R, Tableau, PowerBI, AWS , Spark, ETL, MongoDB, Neo4j, PostgreSQL, Snowflake

Programming: Python (Pandas, Numpy, Pytorch, Scikit-Learn), JS , HTML, CSS, Flask, FastAPI, Linux / Unix / bash

Soft Skills: Cross-Functional Collaboration, Communication, Leadership, Software Development Management.

PROFESSIONAL EXPERIENCE

LA CLIPPERS

Los Angeles, CA

Business Insight Analyst - Intern

June – Dec 2025

- Cut omitted records (~20% → ~10%) using SQL and PowerBI, improving downstream reporting accuracy.
- Identified higher purchase conversion customer segment (~20% +) by building a purchase-journey pipeline in Pyspark.
- Improved retail throughput ~15% by using IOT log data with Python/SQL, partnered with Business/Retail team.

MATCH GROUP - Hyperconnect

Seoul, South Korea

Product Manager – Full time

Apr 2022 - Jul 2024

- Led a Scrum Squad and iterated to engagement ~20%, setting KPIs/roadmaps using JIRA, Confluence;
- Increased active users ~30% by implementing A/B tests on UI & recommendation logic using Firebase, SQL, Tableau.
- Formed a cross-functional new-business TF, defined MVP/UX, and pitched to secure budget for 10+ headcount.

FLITTO

Seoul, South Korea

Product Manager – Full time

Oct 2021 – Apr 2022

- Halved data-delivery lead time (~50%) by building an internal text-annotation product with Python and NLP APIs.
- Grew service revenue by 15% by analyzing traffic and launching a reward-ad feature via Firebase GTM and Python.
- On time delivered \$350K B2B solution, by standardizing PRDs/UX and Agile rituals in JIRA, Confluence, and Figma.

AMAZON WEB SERVICES (AWS)

Seoul, South Korea

Data Analyst - Intern

Jul 2019 – Jan 2020

- Lifted monthly cloud-usage metric ~15% by developing a predictive linear-regression model with Python.
- Contributed to ~10% monthly revenue growth by designing the new evaluation metrics/dashboard for sales / SAs.

PERSONAL PROJECTS

Career LLM Agent Projects

Los Angeles, CA

AI Agent Workflow & LLM

Jun – Oct 2025

- Built LLM AI agents & Workflow to improve job search & preparation experience using LLM API, Python and n8n – [Resume Helper Agent](#) | [Job Matching Agent](#) | [Interview Preparation Agent](#) – opening up for free use to every students.

[UCLA Anderson Research Film Industry Paper Research Project](#)

Los Angeles, CA

Data collection, processing & pipelining.

Jun – Oct 2025

- Built a reproducible research dataset via web-scraping, transformer-based NLP, image recognition model in Python, producing 99k records for research project.

[US Airline Dashboard Pipeline](#)

Los Angeles, CA

ETL, Data Pipeline

Jan – Apr 2025

- Eliminated data loss (60% → 0%) and cut ETL runtime 67% by re-architecting flights/airport/weather pipeline using Python & Spark, stating in Snowflake, and orchestrating Bash jobs on GCP / Linux.
